PROFILE

Computer Science (AIML) student at Bharati Vidyapeeth's College of Engineering, Kolhapur. Strong problem-solving abilities and passion for web development. Foundational understanding of HTML, CSS, and JavaScript. Quick learner and adept at implementing new technologies. Ready to utilize skills in React and responsive design in a web developer role. Eager to contribute and learn in a collaborative environment.

WORK EXPERIENCE

Intern

Coding Raja Technologies - developer

- Developed a basic banking system in Python, implementing core banking functionalities and ensuring smooth system integration.
- Applied object-oriented programming (OOP) principles to enhance system scalability and maintainability.

Next24tech Technology - Frontend Developer

- Created the frontend for a portfolio and e-commerce website enhancing user interface and experience

PROJECT

- Hostel Room Booking System

Developed a Python-based hostel room booking system, enabling efficient room allocation, availability tracking, and user-friendly booking management

- Accidental Alert system and Emergency Notifier

The Accidental Alert System and Emergency Notifier uses an accelerometer sensor to detect sudden impacts or abnormal motion. It instantly sends verified alerts to emergency contacts, enabling a fast and accurate response.
